

1. What precautions need to be taken in terms of clothing and hair?

According to the car repair manual, precautions include avoiding loose clothing or hair to prevent them from getting caught in moving parts. Safety goggles should be worn for eye protection. Ideally, wear a mechanic's jumpsuit which is durable and has pockets for tools. Hair should be bundled up if long, and avoid wearing ties, necklaces, rings, or other jewelry.

2. When and how to check engine oil level?

Engine oil should be checked each time the vehicle is refueled. To check the oil:

1. Turn off the engine.
2. Remove the dipstick.
3. Wipe the end of the dipstick with a rag or paper towel.
4. Reinsert the dipstick.
5. Remove it again to check the oil level against the marks on the dipstick.

3. Below what temperature do we need antifreeze washer fluid?

Antifreeze washer fluid is required in climates where temperatures fall below 32°F (0°C) to prevent the fluid from freezing.
